

SOUND CONTROL PRODUCTS FOR INDUSTRIAL ENVIRONMENTS

Improve productivity in your facility with soundproofing products that have been engineered to specifically reduce sound transmission.

Often used in Manufacturing and Industrial facilities, these soundproofing products are available as wall panels, ceiling tiles, enclosures, barriers, and architectural elements. Each product is durable, easy to install, has highly effective insulation properties and impressive fire rating.

QUILTED DRAPES

Enclose a loud machine or entire area. Water and chemical resistant. Durable. Tan, Black, White, Silver.
\$\$

POLYESTER PANELS

Tames echo and reverberation. Non-allergenic, non-toxic. Tackable. Variety of Colors + any Custom Design.
\$\$

COTTON PANELS

Eliminates echo. 100% recyclable. Ideal for any noise control application. White, Black, Blue, Graphite, Gray, Beige.
\$

LOADED VINYL

Soundproofing barrier. Reduces transmission of airborne noise by blocking sound waves. Strong resistance to adverse environmental conditions. Can be combined with other material.
\$\$

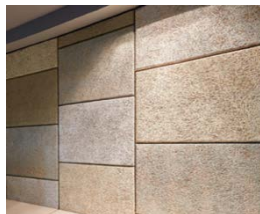

RIGID POROUS

Perfect for wet environments. Non-fibrous. Moisture, impact, bacteria, and fungi resistant. Durable and easy to clean. Charcoal White.
\$\$\$

WOOD FIBER

Impact resistant (good for environments that receive a lot of abuse). Reduces echo through sound absorption. Eco-friendly. Thermally insulating. Paintable. Variety of Colors.
\$\$

CELLULOSE

Soundproofing insulation. Eco-friendly. First of its kind. Reduces airborne sound transmission and deadens sound. Blocks outdoor noise. Can be covered with fabric.
\$

PVC BAFFLES

Best seller. Sailcloth or vinyl encapsulated hanging baffles. High acoustical performance. Moisture and chemical resistant. Easy to clean. Red, Yellow, Blue, Green, Burgundy, Beige, Gray, Black, White.
\$\$

Explain your sound issue and an expert will help you choose the best product for your needs.
